#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Claim Objections***

Claims 4-6 and 11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple-dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-6 and 11 have not been further treated on the merits.

### ***Abstract***

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

(1) if a machine or apparatus, its organization and operation;

Art Unit: 3634

- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 recites the limitation "over the upper region". There is insufficient antecedent basis for this limitation ("upper region") in the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mayer (3,322,288). Mayer discloses a device for detachably holding a transverse rod (1), supported by bracket arms (2a-c), attached to supporting structure (4a-c), the arms having forked shaped connection means (6a-c) comprising an adaptor (28a-c) and

Art Unit: 3634

insert jaws (40a-c and 40a'-c'), made of a resilient, flexible material (Specification, column 1, line 32), the insert jaws having an opening that extends more than halfway around the transverse rod (Specification, column 1, lines 30-36), the insert jaws first widens and then narrows, supporting the rod in place (Specification, column 1, lines 37-51), one side of the insert jaws being more flexible than the other, moving outward in order to allow for the insertion of the rod, before moving inward again to secure the rod in place (Specification, column 1, lines 40-51, and column 3, lines 14-19), and means for fixing the jaws in place (45).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Gould (US 275,481), Fowlkes (US 3,731,817), Elkins (4,991,723) and Kluge (US 6,053,465) all disclose devices supporting transverse rods that include key features of the applicant's claimed invention.
